

Dear class of 2019,

Attached you will find your Physics Summer Assignment. Please read the notes very carefully, and answer all review questions, on LOOSE LEAF, showing all work and/or explanations.

If you are solving a problem that involves math (whether multiple choice or not), please show all the work. If you are answering a question is conceptual (no math requires), please explain why you chose the answer that you chose.

This packet should all be a review from previous years or science and math.

The assignment (all 103 questions, on loose leaf) is due the first Monday back from summer vacation. It counts as 2 homework assignments.

You will have a quiz that first full week of school on some of the content covered in the packet.

Enjoy your summer vacation, and I look forward to teaching you next year!

Ms. Donose ☺
